Our Cable Kits

Outside-of-Post Mount

Inside-of-Post Mount

- Marine Grade 316 stainless steel
- Easy to install for interior or exterior use
- All necessary hardware included in each convenient precut length kit
- 1/8" Cable

Choice Series - 102

- Traditional stud system design
- Budget friendly and can be used with wood or metal posts
- Available in 5', 10', 15', 20', 25', 30', 40' and 50' kits

Preferred Series - 262

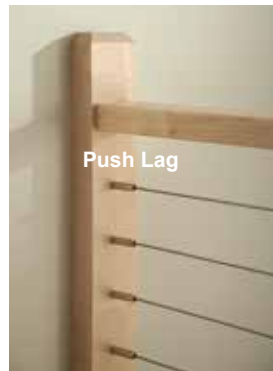

- Easiest install and tension
- Available in 5', 10', 15', 20', 25' and 40' kits

Benefits of Outside-of-Post Mount

- Fittings are completely concealed in most installations
- Can be used on stairs
- Perfect for double corner post installations

Note: Must have at least 3-1/2" clearance behind post for Outside-of-Post installation.
Cable runs cannot terminate into a single post without offsetting the runs.

Push Lag (Part# 3059) Use with the 102 or 262 when you do not have access to the backside of the termination post.
(Sold 2 per pack.)

Stainless End Caps (Part# 3063) Caps for the stud end of the 102. (Sold in packs of 10.)

Select Series - 300

- Two piece lag allows for easy installation using a hex driver or wrench
- Available in 5', 10', 15', 20', 25' and 40' kits

Select Stair Series - 500

- Pivots for stairs or unique angles
- Available in 5', 10', 15' and 20' kits

Benefits of Inside-of-Post Mount

- Runs can be installed into single post without the need to offset
- Sleek and modern fitting design
- Extended lags available for composite sleeve installations
